Aircraft Component Product Line Inspector (PLI)

The position

We are looking for Aircraft Component Product Line Inspector (PLI). PLI is responsible for performing in process inspections of tasks performed IAW CMM, SRM, Standard Practice Manual, Drawings, Routings and approved data with aviation quality standard practices. Daily operational work will be based on the principles of Lean Production.

Key Roles & Responsibilities:

- Perform in process inspection to ensure the repair, painting and assembly processes have been done IAW approved data.
- Check maintenance record (routings and DR reports) and objective evidences (curing chart, curing parameter, ply orientation, paint thickness, heat treatment chart, etc.) to ensure all requirements in approved data are met.
- Raise NC ticket when non-conforming tasks are found.
- Perform receiving and final out parts check for outgoing process.
- Support Tech IV for final-out inspection of aircraft components prior to releasing to service.
- Support Tech IV to verify DR reports to ensure all customer requirements are met and addressed.
- Collect, Prepare, and Verify work packages for completion and correction prior to Tech IV final ARC releases.
- Support Cost of Poor Quality (COPQ) reduction (identification, analysis, action, and verification)
- Perform RCCA of NC tickets and initiate and implement preventive actions of reoccurred non-conforming tasks
- Work closely with Program Manager and Quality Manager to reduce number of reworks in Repair and assembly processes
- Perform inspections upon requests in timely manners to minimize waiting times.
- Ensure product quality to meet all requirements for FAA, EASA, CAAC and other standards with customer satisfaction
- Support warranty investigation report, root cause identification, corrective actions and preventive actions.

Qualifications:

- Diploma with minimum 3 years experiences or Bachelor's Degree –Mechanics / Aerospace Engineering or Related
- Minimum 2 years experiences of Technician roles or 2 years experiences of Production engineer in MRO business
- Operational understanding and troubleshooting skills
- Capability to read and interpret mechanical drawings and work instructions
- Ability to read, write and understand English and computer literacy is required
- Able to read, interpret and understand SRM, CMM Manual, IPCs
- Hands-on skills in using of measuring equipment
- Proficiency in computer skills and Microsoft Suite (MS Word, Office, Excel)
- Able to coordinate and work well with others (i.e. Production and Design Engineers, Planners/Buyers)

Total rewards

As an AAR team member your rewards include:

- Annual uniform
- PPE safety equipment
- Transportation
- Vacation benefits, including Thai Public Holidays
- Provident Fund
- Group Insurance
- Training and development opportunities
- Staff engagement and recognition events

Performance objectives

- **Teamwork** – collaborates with colleagues to achieve results and is also comfortable working independently
- **Building trust** – operates with integrity, discloses own positions, remains open to ideas, and supports others through dignity, respect, and fairness
- **Building relationships and partnerships** – develops and leverages relationships within and across teams to achieve results
- **Communication** – conveys information and ideas clearly and concisely to individuals or group in an engaging manner, helping them understand and retain the message
- **Analytical skills** – must be able to use data to determine cause and effect for complex problem solving
- **Quality orientation** – accomplishes tasks by considering all areas involved, no matter how detailed
-
