Aircraft Maintenance Technician (Mechanical, Structural, and Avionics)

Job description

- Identify problems with aircraft structural, mechanical, hydraulic and electrical systems;
- Adjust and repair these systems in accordance with applicable specifications, technical drawings, manuals and procedures;
- Repair and overhaul aircraft structural, mechanical, hydraulic and electrical systems;
- Install or modify aircraft engines or other aircraft systems, such as mechanical and hydraulic systems, flight control systems, fuel systems and pneumatic systems;
- Disassemble airframes, engines or other aircraft systems for repair, refurbishment, cleaning and reassembly;
- Perform routine maintenance and report on it;
- Identify and place material orders in accordance with company policies;
- Order parts and supplies and maintain an inventory;
- Inform the Quality Assurance Supervisor of irregularities on maintenance work tasks;
- Ensure that the work is performed according to quality standards, AAR policies and procedures and applicable regulations;
- Work closely with the aircraft team leader to ensure that work is completed on schedule;
- Ensure that the aircraft documentation is complete and in accordance with the company's and operator's standards;

- Ensure that the workplace is clean and safe at all times;
- Ensure that the 5"S" program is respected at all times;
- Promote the quality management system and make suggestions for improvement;
- Adhere to and enforce new security policies.

Skills and qualifications

- Hold technical or college training in aircraft maintenance in mechanical, structural or avionics;
- Minimum of 3 to 7 years of experience in the maintenance of civil or military aircraft;
- Good adaptability, organizational skills, attention to detail;
- Be available to work a variety of shifts.
